

Table 1) Comparison between Frequency Distribution of Demographic Variables in Each Group (n= 54; numbers in parentheses showing percentage)

Index	Dexamethasone	Hydrocortisone
Gender		
Female	15 (27.8)	17 (31.5)
Male	39 (72.2)	37 (68.5)
Level of Education		
Under Diploma	29 (53.7)	29 (53.7)
Diploma	19 (35.2)	17 (31.5)
Higher than Diploma	6 (11.1)	8 (14.8)
Job Condition		
State Employee	1 (1.8)	1 (1.8)
Private Employee	4 (7.4)	2 (3.7)
Self-Employment	30 (55.6)	34 (63.0)
Others	19 (35.2)	17 (31.5)

Table 2) Comparison between Frequency Distributions of Stridor, Laryngospasm, and Cough in Two Groups

Variables	Number	Percentage	P Value
Stridor			
Dexamethasone Group	8	14.8	0.61
Hydrocortisone Group	10	18.5	
Laryngospasm			
Dexamethasone Group	8	14.8	0.61
Hydrocortisone Group	10	18.5	
Cough			
Dexamethasone Group	10	18.5	0.48
Hydrocortisone Group	13	24.1
