

**Table 1)** Effect of Cognitive Rehabilitation Intervening Program on Attention Orientation towards the Excitement Faces

Index	Average	P Value
<b>Reaction Time to Relevant Stimulus</b>		
Before Intervention	16.35±1.80	0.001
After Intervention	9.85±0.48	
<b>Reaction Time to Irrelevant Stimulus</b>		
Before Intervention	16.42±1.43	0.001
After Intervention	10.84±0.99	
<b>Number of Relevant Correct Responses</b>		
Before Intervention	19.56±1.01	0.95
After Intervention	19.50±0.97	
<b>Number of Irrelevant Correct Responses</b>		
Before Intervention	19.93±1.03	0.83
After Intervention	20.18±9.40
