

**Table 1.** Absolute and relative frequency of demographic characteristics of the samples (n=556 subjects)

<b>Variables</b>	<b>No.</b>	<b>%</b>
<b>Occupation</b>		
Employed	138	24.8
Housewife	418	75.
<b>Education</b>		
Below diploma	179	32.2
Diploma	151	27.2
Associate degree	41	7.4
Bachelor	145	26.1
Masters and Ph.D.	40	7.2
<b>Marriage</b>		
Consanguine marriage	85	15.3
Non-consanguineous marriage	471	84.7

**Table 2.** The mean scores and correlation coefficients between sexual anxiety, sexual knowledge, and sexual attitude

Variables	Scores	1	2
1- Sexual anxiety	44.72±11.15	1	
2- Sexual knowledge	78.81±13.18	**-.0358	1
3- Sexual attitude	79.26±10.50	**-.0302	**0.448

\*\* p<0.001

**Table 3.** Multivariate linear regression test coefficients to investigate the effect of sexual knowledge and attitudes on sexual anxiety

<b>Predictive variables</b>	<b>B coefficient</b>	<b>t</b>	<b>R coefficient</b>	<b>R2 coefficient of determination</b>	<b>p-value</b>
<b>Sexual knowledge</b>	-0.279	6.370	0.391	0.153	0.001
<b>Sexual attitude</b>	-0.176	4.030
