Table 1) The mean scores of the research variables

Variables	Scores
Factors related to policy implementation	
Clear goal setting and correct policy formulation	3.47±0.52
Support from legal authorities	3.15±0.72
Behavioral and personality characteristics of executors	3.43±0.76
Expertise and skills of executors	3.34±0.75
Target groups and users	3.08±0.81
Efficient administrative system and bureaucracy	3.34±0.72
Selection of the right tools and resources	2.95±0.78
Policy implementation	
Implementation of public policies	3.36±0.80
Implementation of specialized policies	3.89±0.77
Islamic value system	
Responsibility	4.21±0.61
Supremacy and competition	4.03±0.65
Honesty	4.39±0.62
Respect for others	4.28±0.65
Values and norms	4.31±0.66
Justice and fairness	4.55±0.60
Sympathy	4.51±0.59
Loyalty	4.40±0.63

Table 2) The test result of model review

Model paths	Path coefficient	t	P-value
Factors related to policy implementation → Policy implementation	0.836	17.138	0.001
Factors related to policy implementation →Policy implementation (with adjustment of Islamic value system)	0.250	6.673	0.001
Factors related to policy implementation× Islamic value system→ policy implementation	0.100	2.797	0.005

	Path coefficient	t	P-value
Factors related to policy implementation → Policy implementation	0.836	17.13 8	0.001
Factors related to policy implementation →Policy implementation (with adjustment of Islamic value system)	0.250	6.673	0.001

Table 3) Fit indices of the proposed research model

Indices	Acceptable limit	Reported value
Normed Chi-square (CMIN / DF)	Equal to or less than 3	1.599
Good Fit Index (GFI)	Equal to or greater than 0.9	0.980
Modified Fit Goodness Index (AGFI)	Equal to or greater than 0.9	0.959
Normalized Fit Index (NFI)	Equal to or greater than 0.9	0.989
Incremental Fit Index (IFI)	Equal to or greater than 0.9	0.996
Tucker-Lewis Index (TLI)	Equal to or greater than 0.9	0.993
Comparative fit index (CFI)	Equal to or greater than 0.9	0.996
Root of Mean Squares Estimation Error (RMSEA)	Equal to or less than 0.08	0.039
