

Table 1) Comparison between Relative and Absolute Frequency of Some Preterm Infants' Outcomes in Two Groups

Single-dose Group (n=50)	Double-dose Group (n=53)	P Value
Enterocolitis		
4 Persons(8.0%)	7 Persons(13.2%)	0.392
Respiratory Distress		
14 Persons(28.0 %)	13 Persons(24.5%)	0.689
Intraventricular Hemorrhage		
4 Persons(8.0%)	7 Persons(13.2%)	0.689
Neonatal Sepsis		
1 Person(2.0%)	6 Persons(11.3%)	0.06
Neonatal Hospitalization Need		
42 Persons(84.0%)	41 Persons(77.4%)	0.394
Respiratory Support Need		
8 Persons(16.0%)	9 Persons(17.0%)	0.893
Newborn Death		
12 Persons(24.0%)	10 Persons(18.9%)	0.525
