

Table 1) Comparison of the mean of the simple and selective reaction time (in terms of milliseconds) in form of visual and auditory in pretest and posttest phases between the experimental and control groups (n=8 in each group)

Variables	Pretest	Posttest
Simple auditory reaction time		
Experimental group	367.12±86.87	322.92±60.17
Control group	343.12±60.46	388.11±60.93
Selective auditory reaction time		
Experimental group	611.16±0.94	488.12±40.35
Control group	618.22±66.75	626.20±73.59
Simple visual reaction time		
Experimental group	533.25±33.70	403.15±33.39
Control group	687.23±66.57	626.20±73.59
Selective visual reaction time		
Experimental group	728.21±73.83	615.12±46.04
Control group	835.40±60.30	813.22±73.77
