

Table 1) Absolute and relative frequency of menstruation, hypertrichosis, ovulation in women with infertility and diagnosed as resistant to PCOS referring to Sarem Specialized Hospital during a five-year period (183 people)

Variables	Frequency	Percentage
Menstrual status		
Menstruation with small amount (oligomenorrhea)	141	77.1
Irregular menstruation	19	10.4
Regular menstruation	15	8.2
Lack of monthly menstruation (primary amenorrhea)	7	3.8
Multiple lack of menstruation	1	0.5
Induction coordination		
Positive	104	56.8
Negative	63	34.4
Missing data	16	8.7
Ovulation after laparoscopy		
Positive	138	75.4
Negative	32	17.5
Missing data	13	7.1
Hypertrichosis		
Positive	90	49.2
Negative	71	38.8
Missing data	22	12.0
