

Table 1. The frequency of physical, psychological and social health of elderly participating in the research (n=382)

Variable	Mean	SD	Score range	Health status based on the cut-off point No. (%)
Physical health	14.67	3.39	-14-28	200 (52.4)
Social health	25.56	5.90	-15-45	217 (56.8)
Mental health	21.78	5.3	-12-36	231 (60.5)

Table 2. The mean, standard deviation and average percentage of maximum achievable social isolation dimensions score in the elderly

Dimensions of social isolation	Mean	SD	Score range	Average (100%)
Family relationships	6.56	1.52	20-5	32.8
Local linkages	Sep-39	9.04	18-72	54.3
Translocal linkages	18.23	4.21	7-28	65.1
Associative connections	6.54	1.51	2-8	81.8
Instrumental social capital	18.77	4.34	6-24	78.2
Total mean	94.98	21.95	38-152	62.4

Table 3. Correlation between different dimensions of physical, social, and psychological health and the level of social isolation in the elderly

Studied variables	1	2	3	4
Mental health	1			
Social health	0.647**	1		
Physical health	0.383*	0.367*	1	
Social isolation	-0.456**	-0.325*	-0.378	1

*<0.05; **<0.01
