

Table 1) Comparison of frequency distribution (number and percentage) of genotypic and allelic polymorphism rs4151667 (C.26T> A) CFB gene between the patient (n=44) and control (n=50) groups in Gonabad population

Variables	Patient Group	Control Group	Percentage of Chance	Significance Level
Genotypes				
AA	0	0	0	1.00
AT	2(4.5%)	6(12.0%)	0.34	0.025
TT	42(95.5%)	44(88.0%)	2.86	0.048
Alleles				
A	2(2.3%)	6(6.0%)	0.36	0.12
T	86(97.7%)	94(94.0%)	2.73	0.17

1. Marker 2. PCR Product 3. TT Genotype 4. Genotype A
