

Table 1) Average scores of driving behavior in the experiment and control groups

Significance of inter-group test	average		stage
	control	experiment	
0.385	119.8±20.8	116.4±20.3	Pre-test
0.0001	113.4±22.6	73.6±23.4	Post-test
0.0001	110.7±20.9	57.6±20.1	Follow-up

Table2) Average total scores of Pender's health promotion model constructs

Significance of inter- group test	average		stage
	control	Experiment	
0.301	48.6±0.4	49.4±6.2	Pre- test
0.0001	49.6±8.1	65.6±7.0	Post- test
0.0001	50.5±4.3	73.3±7.2	Follow- up
