

Table 1) Comparison between the Dimensions of Quality of Life in Patients before and after Cardiac Rehabilitation following Coronary Artery Bypass by Graft Surgery

Dimensions of Quality of Life	Experimental Group	Control Group	P Value
Before Cardiac Rehabilitation Intervention			
Health and Operation	14.21±2.06	14.29±1.50	0.85
Socio-economic	13.19±1.98	14.90±2.91	0.06
Psycho-spiritual	14.11±2.55	15.09±1.95	0.07
Family Relationships	14.46±1.49	14.71±1.25	0.44
Total Score of Quality of Life	14.50±1.20	14.20±1.60	0.409
After Cardiac Rehabilitation Intervention			
Health and Operation	19.83±1.25	18.68±1.23	0.001
Socio-economic	19.54±1.36	19.13±1.55	0.24
Psycho-spiritual	19.36±1.39	18.86±2.09	0.24
Family Relationships	19.93±2.05	18.20±2.40	0.02
Total Score of Quality of Life	19.99±1.11	18.49±1.48	0.001
